

IDE offers local service for China

Shanghai, China (February 25, 2015) - Integrated Dynamics Engineering Will Highlight the Success Of Its New IDE China Technical Sales and Service Facility In Shanghai's Pudong New Area At SEMICON China In The German Pavilion.

With the opening of SEMICON China (March 15-17) at the Shanghai International Expo Centre, Integrated Dynamics Engineering will introduce visitors to IDE's new, fully operational Technical Sales and Service facility in the New Area of Pudong in Shanghai China.

IDE's highly trained Chinese staff can now conduct detailed site surveys, advanced training, equipment installations and repair, in addition to negotiating all sales and schedules at the local level.

IDE's operation in Shanghai has been operational for more than 3 years. This operation has been providing high performance isolation to the top tier of China's Semiconductor Equipment Manufacturers as well as many of the Key Technology Laboratories of the Chinese Academy of Science.

IDE is working "hand in hand" to assist in China's push to become a world leading developer and supplier of high technology.

In the lithography and metrology areas, IDE has been supplying its world renowned TCN Systems. This system provides 4x improvement in settling time for maximum wafer throughput and provides "state of the art" isolation performance to maximize the tool's resolution.

In the advanced lithography area, IDE provides its "peerless" NGI System. The NGI system provides better isolation than any other available product on the global market today. This system boasts a 16x improvement in isolation performance compared to any systems designed for advanced lithography. In support of China's Key Laboratories, IDE has drawn from its vast isolation technology base to support numerous applications each with its own unique demands and requirements.

IDE has also supported many of the SEM/TEM laboratories with its high end isolation technology (PAD Series) as well as its magnetic cancellation technology (MK4)

For more than 25 years IDE has been serving a broad range of customers globally, among them, the SEM/TEM markets, Universities and Institutes developing high-resolution metrology and lithography system, MRI centers, and many other technical communities worldwide.

To view IDE's comprehensive array of leading active and passive vibration isolation systems, acoustic controls, EMI cancellation solutions, and robotics, visit IDE's easy-to-navigate web site at www.ideworld.com

To contact IDE and our local representatives in Shanghai, please email us at info@ideworld.com. We will respond promptly. IDE looks forward to a productive conversation with you soon.
